

PRODUCT INTRODUCTION

Powder Ampoule · Glutathione · Collagen · Brightening | 8g

A powder-form ampoule combining Glutathione and Collagen — melts on contact, revealing luminous, deeply hydrated skin.

Developed as a **powder ampoule** that combines Glutathione and Collagen for everyday skincare.

Before application, the formula is a fine, non-tacky powder. On contact with skin, your body warmth melts it into a clear, moisture-rich ampoule essence.

Lightweight, fresh, and protected from oxidation until the very moment of use.

GSH

Glutathione

Brightening master antioxidant

HC

Hydrolyzed Collagen

Elasticity + Hydration

3L

3-Layer System

Defense · Bounce · Balance

1. Sophisticated Powder Ampoule — 3-Layer System

A meticulously designed three-layer architecture that protects, plumps and balances the skin in a single step.

- **Antioxidant Defense Layer:** **Glutathione**, **Niacinamide** and **Tocopherol** shield the skin from external aggressors while keeping skincare ingredients stable.
- **Elasticity & Hydration Layer:** **Hydrolyzed Collagen** and **Sodium Hyaluronate** build elasticity and moisture on the skin surface, reinforcing the efficacy of subsequent skincare steps.
- **Skin-Balancing Care Layer:** **Green Tea** and **Birch Bark Extract** act as a soothing base layer, helping the skin maintain a calm, balanced state.

2. Snow-Melting Technology — Transforms on Contact

Unlike conventional ampoules that absorb after application, this powder reacts to the skin's temperature and pressure and transforms into a moisturizing ampoule the moment it touches the skin.

- **Snow-like Melt + Ultra-Fine Particles:** Powder containing Glutathione + Collagen dissolves like snow. Micro-particles at **~1/35 the size of a pore** drive actives deep into the pore for elevated efficacy.
- **Stable in Storage:** Powder form minimizes oxidation risk during storage, keeping ingredients stable even under varying light and temperature.

3. Time Capsule Technology — Freshness Sealed In

Sensitive actives that easily destabilize in moisture are encapsulated, so they reach your skin in their freshest, most stable form.

- **Encapsulated Actives:** Unstable ingredients are protected inside **micro-capsules** and delivered to the skin in their most stable condition.
- **Body-Heat Activation:** Micro-particle powder preserves freshness until the moment of use; on contact with body heat the formula activates instantly on the skin, supporting visible **whitening** (brightening) results.

Glutathione · Collagen · Snow-Melting · Time Capsule
